The Golf Academy at BIGHORN

Led by Director of Instruction
Tom F. Stickney II

Improve your Game, this Time for Good!

Swing Motion Analysis

In this one hour program we will analyze the inner-workings of your golf swing using our four camera digital video analysis system, center of gravity monitor and launch monitor. This allows you to understand your golf swing like never before. These tools along with your custom improvement plan and take home DVD of your lesson will accelerate the learning curve at any age or handicap level!

Swing Motion Analysis Packages:

- 1) One Hour Lesson \$200 (Includes Student DVD)
- 2) Unlimited Instruction for the Season \$2,500

All Lessons in Series Must be Completed by May 15, 2012.

All Lessons in series are non-transferrable and no refunds will be given for unused lessons.

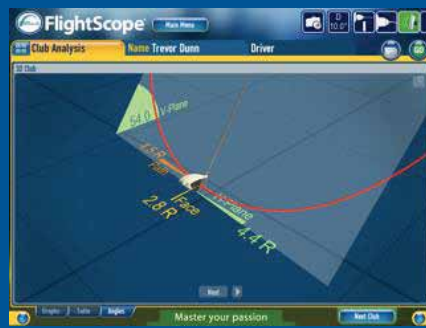

Driver/Wedge Fitting, Yardage Gap Testing or Loft/Lie Fitting

Using the FlightScope Launch Monitor we will now be able to analyze your driver's distance output and dispersion, chart your iron carry distances and trajectory and/or test the bounce and spin rates of your wedges in order to maximize your ball flight control and distance output on the golf course. With this program your clubs will be tested and altered (if necessary) in order to eliminate any inconsistencies you might possess.

Fitting and Alteration Packages:

- 1) Driver, Wedge, Yardage Gap, Loft/Lie Testing and Alteration \$100 Each
- 2) Total Game Analysis/Fitting (includes all programs above) \$250 Total

The Putting-Lab at BIGHORN

The Putting-Lab at BIGHORN is unlike anything you have ever seen. An industry exclusive systems integration including: indoor and outdoor testing using the SAM PuttLab System coupled with Four Camera Digital Video Analysis, a Center of Gravity Monitor and video based Skid and Roll Testing.

The Putting-Lab Program will improve your green reading skills, explain and improve your current mechanics, provide any custom alterations to the putter you currently use helping you to become a virtuoso on the greens for good. This hour-long program includes your initial analysis, custom improvement plan, any necessary putter adjustments, a summary printout of your current stroke mechanics, and/or a take home DVD of your entire putting lesson.

Measures: Address Face Alignment, Impact Face Alignment, Putting Arc Curvature, Overhead Path Direction, Horizontal/Vertical Impact Point, Skid/Roll, Clubhead Rotation, Shaft Lean, Side View Stroke Shape, Dynamic Loft, Rise Angle, Putter Height at Impact, Score and Consistency of Putting Stroke, Stroke Length, Follow-through Length, Face Change During Stroke, Face on Path, Movement Dynamics, Velocity of Putterhead Rotation, Backswing Rhythm, Impact Rhythm, and Impact Timing.

The Putting-Lab Packages:

- 1) Putter Fitting: Testing the Design, Length, Weight, Loft and Lie of your Putter: \$50
- 2) The Putting Lab Analysis: One Hour Lesson (Including any Club Alterations) \$150
- 3) The Putting Lab Analysis, plus a One Hour Follow Up Putting-Lab Lesson \$250
